OURCE	On 2h July 1951, no changes were observed at the previously reported installations
2.	the size of a 15-ton railroad car, were seen on the loading ramp. (1) eight smaller boxes, each about the size of a coffin, stood near the crates. They seemed to be omity because they were easily handled by the soldiers. No changes were observed at the four radio installations situated around the field. (2) The air force barracks installation in the southwestern corner of the field seemed to be occupied by 300 100 soldiers who were black-bordered light blue epsulets. Jet aircraft were parked in the southern dispersal area. A three-digit red
	number was seen on the nose compertment of the southernmost plane. The Soviet of the swere bordered white. No colored stripes were observed on the planes. (3) The intake and air exhaust apertures had no protective lids. Four jet planes were observed in front of the easternmost hangar. Two small single-engine aircraft were seen between this large hangar and another hangar farther westward. About 50
	riditional jet aircraft were seen north of the eastern section of the barracks istallation. Farther to the west there were six single-engine low-wing monoplanes in a radial engines.
3。 5X1C	istallation. Farther to the west there were six single-engine low-wing monoplanes in a radial engines.
	Between 8 and about 11 a.m. on 24 July, 14 take-offs and 12 landings were counted at irregular intervals of at least 5 minutes. These flights were made by jet plane from all three parking sites. A radio truck with an extended antenna about 2.5 maters high was parked on the mass at the eastern end of the number. Passenge
5X1C	Between 8 and about 11 a.m. on 24 July, 14 take-offs and 12 landings were counted at irregular intervals of at least 5 minutes. These flights were made by jet plane from all three parking sites. A radio truck with an extended antenna about 2.5 maters high was parked on the mass at the eastern end of the number. Passenge
